### **Station 1: Hose Drag**

The candidate will pick up and drag 100' of 5" hose 125' and wrap around the designated hydrant. The candidate will walk 75' to the second station.

### **Station 2 - Forcible Entry & Ventilation:**

For this station you will use a 9lb. shot mallet provided to move the 160-lb steel beam a horizontal distance of 5' by repeatedly striking it. Once the weight has been moved to the end of the slide the test proctor will tell you when you have completed the station. Once completed you will walk 30' to the front of the building.

### **Station 3 – Stair Climb**

For this station you will pick up a 100' 1¾" high rise pack, place it on your shoulder and carry it to top floor of the burn building. Once you have reached the top landing you will turn around and carry the high-rise pack back down the stairs until you reach the second-floor landing where you will drop the high-rise pack per the proctor's instruction. You will then walk 15' down the second-floor hallway to your next station.

### **Station 4 – Hose Hoist**

For this station you will walk down the second-floor hallway to a designated window. There you will grab the rope and hoist a 50' 3" hose roll up to the window and then pull the load inside the window and place on the floor. Then you will walk down the stairs and into the first-floor fire room.

### **Station 5 – Rescue**

For this station you will find a 154lb dummy laying in the floor. You are to move the dummy from that point, down the hallway and out into the stairway to a designated point 75'. The test proctor will tell you when you can stop dragging the dummy. You will then proceed around the burn building to the back side of the paved area 150' away.

### **Station 6 - Equipment Carry**

In this station you will pick up and carry two 40lb weights 75' to a designated line where you will place the weights on the ground. You will then walk 75' to your final station.

### **Station 7 – Ladder Carry**

In this station you will carry a 14' roof ladder 75' to the finish line. Once the ladder has crossed the finish line you will be instructed to place the ladder on the ground. Your physical assessment is completed.
